Work Experience

Full Stack Developer

EVERDRIN APR. 2018 - DEC. 2020

- Implemented complex UI components with React/Redux/TypeScript and SCSS.
- Developed a prototype used to visualize transportation routes using Vue, Antd, Tailwind
- Designed several charts for the visualization of complex data sets using React, D3.js
- Developed unit tests and component snapshot tests
- Oversaw and was responsible for the technical output of teams working on Denmark's most popular apps.

Full Stack Developer

THUMBSTACK TECHNOLOGY AUG. 2015 - MAR. 2018

- Developed the back-end (MongoDB, Node.js) and the front-end (React) features.
- Implemented the CI system, optimization of the code, and the testing of the framework for the frontend (Vue, Vuex) and backend (PHP, Laravel, MySQL)
- Created a testing automation laboratory, admin panel, and the testing automation framework (end to end).
- Architected a new application based on a graph database.
- Took over the project when there were a lot of performance issues and code complexity that caused data inconsistencies. I cleaned up the existing code and optimized the performance of the responses.
- Mentored staff on new technologies such as ASP.NET and Angular 6+.

Full Stack Developer

SPARK APR. 2013 - JUL. 2015

- Created a REST API for mobile applications.
- Developed a set of scheduled jobs on handling different transaction types.
- Fixed bugs and reviewed code.
- Created an electronic tickets system with SMS authorization
- Designed custom MEAN (MongoDB, Express, Angular, and Node.js) web applications with MEAN.IO.

Education

Faculty of Technical Sciences, University of Novi Sad

Master's degree, Computer science

2006-2011
